DCN4421 : Mobility and Data Management

The Mobility and Data Management course surveys the tools students will need to effectively manage their video and other assets during the production process and upon delivery to multiple end platforms. Students will learn backup and archive strategies, metadata logging, container codecs and formats, and industry-accepted workflows for video data management. Students will learn how to configure their end product to broadcast and web specifications, allowing their videos to be viewable from any device or medium.
