ITE229 : Project and Portfolio II: Information Technology

The Project and Portfolio II: Information Technology course combines hands-on learning experiences with summative and formative portfolio assessments. In this course, students will extend their existing project by applying their knowledge of system scripting, application servers, and storage systems to build a networked multiple-server project. Students will demonstrate the design, installation, and configuration of a web- and database-server system using scripting automation and network storage. They will also complete a written project plan documenting the system and design decisions that were made based on research of industry best practices.
