CTI3561 : Systems Performance and Capacity Management

In the Systems Performance and Capacity Management course, students will be introduced to techniques to measure and thereby improve system performance. Topics such as cloud and virtualization performance and capacity management will be explored. Industry-standard tools to measure such performance will be introduced as well as the means to successfully utilize them. Students will be able to identify which metrics are vital and how to leverage them to increase the performance and capacity of a data system.
