

ITE469 : Project and Portfolio VI: Information Technology

The Project and Portfolio VI: Information Technology course combines hands-on learning experiences with summative and formative portfolio assessments. In this course, students will extend their existing project by applying their knowledge of cloud storage, APIs, system capacity, and performance management to scale their cloud-based system for greater performance. Students will learn to implement a system using performance-monitoring tools. They will be able to quickly scale systems up and down using APIs and automation tools and will be able to provide technical documentation about the system.
