

WDV1100 : Introduction to Web Architecture

The Introduction to Web Architecture course introduces students to principles of web development and application architecture. Students will identify the elements necessary in a functional web application. They will examine how data flows between technical components and distinguish the many team member roles and responsibilities spanned by the work. They will develop an understanding of basic web page syntax using HTML and CSS. By completion of the course, students will fundamentally grasp how key components of web-based applications integrate with each other.

Credits 4

Course Length 4 weeks

Please note: This course must be successfully completed within 2-attempts. Students unable to successfully complete the course within 2-attempts will be dismissed from the program.
