

WDV463 : Deployment of Web Applications

In the Deployment of Web Applications course, students will learn the processes involved in deploying applications into production environments and the design patterns for scaling web applications to meet the demands of client connections. This course demonstrates current operational methods for deploying web-based applications from working development environments to usable production environments. Students will ensure their web services can be discovered with an application ecosystem and an introduction to continuous delivery approaches and their tactics.

Credits 4

Course Length 4 weeks
