WDV4416 : Web Application Integration

In the Web Application Integration course, elements of web development come together with an emphasis on the integration and testing of complex, interactive solutions being prepared for deployment. Students will perform stress testing on existing application code to determine the code's effectiveness under load and apply remediations to meet performance metrics. This course teaches skills required to produce web solutions that factor design elements such as load balancing, replication, and failover strategies to ensure application integrity and availability.
