

# CYB3311 : Security Compliance and Privacy

The Security Compliance and Privacy course provides students context and understanding of the legal and privacy frameworks regulating the information security realm. This course explores the laws and compliance parameters that apply to various worldwide governing jurisdictions and independent industry bodies. Students will recognize the responsibility surrounding the safe storage, processing, and protection of data under their supervision. They will evaluate their professional, ethical, and legal duty to report and respond to incidents and to comply with applicable set rules.
