

CYB349 : Project and Portfolio IV: Cybersecurity

The Project and Portfolio IV: Cybersecurity course combines hands-on learning experiences with summative and formative portfolio assessments. Students will begin developing a holistic security program plan for an organization. In this written plan, students will identify applicable security functions and develop policies to protect information, apply user access control, and establish system change management processes. They will specify the roles and responsibilities of job functions from senior management to information security staff and outline the escalation process for incidents. This written security program plan will be expanded and refined throughout future courses.
