CYB479 : Project and Portfolio VII: Cybersecurity

The Project and Portfolio VII: Cybersecurity course combines hands-on learning experiences with summative and formative portfolio assessments. In this course, students will finalize their security program plan by analyzing its performance within an enterprise system design. Students will conduct testing against simulated large-scale systems to observe the methods and issues that arise along an entire system life cycle. They will then document any technical changes needed and finally revise their written plan to correct for any program deficiencies detected.
