DEV1000 : Introduction to Development I

In the Introduction to Development I course, students will develop critical-thinking and problem-solving skills by surveying modern data-flow and control-flow techniques and their usage in application development. Through learning the concepts of conditional logic, data types, and logical structures, students will build their knowledge of how to craft solutions programmatically.

Credits 4
Course Length 4 weeks
Please note: This course must be successfully completed within 2-attempts. Students unable to successfully complete the course within 2-attempts will be dismissed from the program.
