CTI3323 : Cloud Management Platforms

The Cloud Management Platforms course explores the concepts and architecture of public, private, and hybrid cloud-management stacks and software; how to design and deploy a multilayered and partitioned system; and the principles of managing these systems. Students will apply the virtualization, networking, storage, and scripting skills they have gained using proprietary and open-source cloud software. Knowledge of the architecture of cloud-management platforms will be further implemented in advanced courses.
