ITE155 : Project I: Information Technology

In Project I: Information Technology, students will apply their knowledge of operating systems, networking, and security practices to plan a technology solution based on a typical use case. Through this course, students will demonstrate and troubleshoot the design, installation, and configuration of a working project with servers and user endpoints. They will also create a written project plan documenting their work and detailing how they plan to support users and technology systems. They will explore continuing education opportunities and prepare for an industry certification test.

Credits 2
Course Length 4 weeks
